SAIRAJ PRASHANT DESHMUKH

ASPIRING DATA SCIENTIST | B.TECH - ELECTRONICS AND TELECOMMUNICATION ENGINEERING

7447468986 | deshmukhvidyut771@gmail.com | GitHub: github.com/Sairaj-star

PROFESSIONAL SUMMARY

Electronics and Telecommunication Engineering student pursuing a B.Tech, with experience building web applications, Python-based automation, and embedded systems projects. Proficient in C, Python, HTML, CSS, and JavaScript; currently learning SQL and foundational NumPy and pandas. Interested in applying programming, mathematical problem-solving, and growing data skills to scientific and technology-focused challenges.

EDUCATION

Bachelor of Technology in Electronics and Telecommunication Engineering

Government College of Engineering, Yavatmal | 2023-2027 (Expected) | Currently pursuing

Higher Secondary School (Class XII) - School of Scholars, Nagpur | 2020-2022 | Completed

INTERNSHIPS AND TRAINING

Full Stack Web Development Internship

Skill India Digital Hub, Yavatmal | November 2025-March 2026

- Training in HTML, CSS, JavaScript, Python back-end development, and API use; applied these skills in independently developed web projects.

Embedded C Using 8051 Microcontroller Internship

EFY Training Institute | September 2024-August 2025

- Studied Embedded C programming, 8051 microcontrollers, and 8085 microprocessor concepts.

SOFTWARE PROJECTS

Finance Tracking Dashboard | money-mind-l2og.onrender.com

Developed a personal finance tracking dashboard with a PIN entry screen.

Technologies: HTML, CSS, JavaScript, Python

AI Study Coach | ai-study-coach-5i0n.onrender.com

Built a dashboard for tracking study activity.

Technologies: HTML, CSS, JavaScript, Python

Telegram Image Creator Bot

Created a Telegram bot using Python and the Higgsfield API. It collects user input and saves information to a file.

Technologies: Python, Higgsfield API, Telegram

Zenith | zenith-htxt.onrender.com

Built a daily task-writing dashboard with a paywall.

Technologies: HTML, CSS, JavaScript, Python

SOFTWARE PROJECTS - CONTINUED

Lunex | lunex-4-0.onrender.com
Developed a private-room chat website organized around rooms and suites.

Technologies: HTML, CSS, JavaScript, Python

Personal Jarvis (In Development)
Developing a personal AI assistant independently; project is in progress.

HARDWARE PROJECTS

Automatic Vehicle Tracking Device
- Designed and programmed an IR-sensor-based vehicle tracking project; completed the hardware simulation and programming independently.

Automatic Room Light
- Created an automatic lighting project that responds to sunlight conditions and user-selected settings.

Automatic Dustbin Robot
- Built a robot project designed to clean floors and collect trash.

TECHNICAL SKILLS

Programming and Web: C, Python, HTML, CSS, JavaScript, Embedded C

Data Science Learning: NumPy and pandas (foundational learning); SQL (currently learning)

Electronics and Engineering: Electronics fundamentals, circuit simulation, 8051 microcontroller, 8085

Engineering and Development Tools: MATLAB, Simulink, Ansys HFSS, Proteus, GNU Sim 8085, Keil, Git, GitHub

Office and Productivity: Microsoft Excel, Microsoft Word, Microsoft PowerPoint

Creative Tools: Canva, Adobe Express, Blackmagic Design

CERTIFICATIONS

- Google Cloud Cybersecurity - Google
- Introduction to Computer Networking - Simplilearn
- AI Fundamentals - Open AI
- Explore AI Basics and Generative AI - Microsoft
- Embedded Systems and Circuit Simulation - Honeywell Academy

PROFESSIONAL SKILLS

Critical thinking, report writing, situational awareness, work planning, process improvement, problem solving, active listening, time management, adaptability, conflict resolution, team collaboration, project management, and quick learning.

INTERESTS

Mathematics, programming, technology, space and scientific applications, and automation.
